SASKATCHEWAN PROVINCIAL ECONOMIC ACCOUNTS

PREFACE

This release of the Saskatchewan Economic Accounts contains revised estimates for the Saskatchewan economy for 2001.

Several changes have been incorporated into the accounts since the last release in May, 2002. Foremost is the adoption of the Chain-Fisher methodology to calculate real expenditures and Gross Domestic Product (GDP).

Previously, the Laspeyres method had been employed, but the updating of base years tended to result in restating growth rates when newer prices were introduced. The Fisher method eliminates substitution bias by updating the base period each time an estimate of economic growth is produced. Readers who wish to receive real GDP data in constant 1997 prices should consult the Bureau's Economic Review, available for download at www.gov.sk.ca/bureau.stats

Three major revisions have taken place with GDP at Market Prices. Corporate profits before taxes have been revised back to 1992. New data for the profits of non-financial enterprises has been incorporated. The result has been to revise the corporate profits series upward.

Secondly, farm inventories have been revised back to 1986 to take into account inventory data contained in the 1996 Census of Agriculture. The result has been to revise accrued net farm incomes.

Finally, fees for motor vehicle licenses and permits, and hunting and fishing licenses are now classified as transfers from persons to government. Previously, they had been treated as taxes on production. This new method has resulted in downward revisions to personal expenditure, taxes on production, government expenditure, and, therefore, Gross Domestic Product.

Readers will note that the GDP by Industry tables have not been updated. These tables are based solely on data provided by Statistics Canada. The current GDP by Industry tables are based on 1980 Standard Industrial Classification (SIC) definitions, terminating in 1997 for current dollars and 1999 for constant dollar estimates.

Statistics Canada is in the process of revising historical GDP by Industry data on the basis of North American Industrial Classification System (NAICS). This change in classification does not affect aggregate totals; what is affected are data for individual industries. Data are available, in NAICS, for the years 1997-2001. We have opted to not publish these tables. However, they are available from the Bureau upon request.

Finally, while some data series may have seen revisions dating back to 1951, subscribers of the paper publication will only receive data for the years 1980-2001. It is vital to note that data for 1950-1979 currently in the Saskatchewan Economic Accounts are no longer consistent with the tables in this package and should be discarded. Those who wish to obtain data for 1951-1979 for their "red binder" should visit the Saskatchewan Bureau of Statistics website (www.gov.sk.ca/bureau.stats) and follow the link to the 2001 Saskatchewan Provincial Economic Accounts in order to retrieve an electronic copy.
